56 sec

Air inside the pod is fully renewed every 56 seconds with maximum air flow.

SENSITIVE INFORMATION HANDLING

0 %

We respect the privacy of our customers' data regarding the use of soundproof pods and will not use it as a prerequisite for making the pods smart.

Privacy-First Smart Innovation
Dancoo' smart pods, featuring a high-resolution touchscreen, it simplifies the setup and adjustment of the ventilation and lighting systems within the soundproof pod, while also enabling you to schedule pod time from anywhere in the world.
We respect the privacy of our customers' data regarding the use of soundproof pods and will not use it as a prerequisite for making the pods smart.

Ultimate Dual Privacy Shield
The original design intention of Dancoo Dawn is to protect clients' business privacy and acoustic privacy in their workspaces. We recognize that data regarding clients' usage of soundproof pods constitutes their business privacy, and we do not transmit or process such highly sensitive information. In terms of acoustic privacy protection, Dancoo Dawn's A-Class soundproofing performance assures the pods can be placed next to workstations without causing noise distractions to the occupants in the pod or to the people outside. And echo-free interior acoustics make Dancoo Dawn a private, comfortable space for work and video calls.

Airflow that keeps you fresh
With our smart airflow system, you can feel refreshed and focused. Our improved ventilation keeps the air around you fresh every minute, like a clean and cozy space. You can easily adjust the ventilation with just one touch on the pod's touchscreen. Our advanced ventilation solutions make you feel comfortable and convenient.

Even Closer to Nature
By incorporating high CRI lighting that mimics natural daylight and using natural birch plywood materials, Dancoo Dawn creates a workspace that feels even closer to nature. Automated dual-lighting sources adapt to your needs, and preset lighting options are available for you to choose from, suitable for either work or video mode. Video-optimized lighting enhances your appearance during video calls. Adjustments can be made quickly and easily through the touchscreen display.
